

Celestial Bodies Work In Seven Different Ways

Another thing I should add is that there's an unlimited number of celestial bodies that work in seven different ways and it may surprise you that universes are just the tip of the iceberg and then some.

- Ultraverses
- Multiverses
- Universes
- Galaxy's
- Solar Systems
- Planets
- Sentient Life

I should note that over the summer our expedition team moved to earth and the sol system to our home galaxy of shangri-la in our ultraverse called Shamabhala this is a permanent thing because the sol system in the third dimension was being oppressed by the exiled old souls that we left behind on earth as a punishment for getting out of line all 300 hundred of them. We expelled them from existence forever because they where a nuisance after all and nothing we did changed them so that's it there out of of the picture forever.

The dimensions and ultraverses from one to three hundred are deleted existence
